Figures are sorted by total in 2018. Figures are rounded to the nearest multiple of 5. Figures include applications from EU citizens. "0" means data not yet available. The last column in the uppermost table is based on yearly data from Eurostat. Because of the aforementioned rounding to multiples of 5 there are small differences with the monthly data.

In 2018 Germany registered the highest number of applications, followed by France and Italy. Figures for February, March, April and May 2018 are not yet available for all EU countries. Syria, Iraq and Afghanistan are the most important countries of origin in the influx of first asylum applications in the EU.

## Special Theme: First Asylum Applications in Europe (2nd half of 2017) related to country Area, Population and GDP

### Introduction

Biannually the influx of asylum seekers in Europe is related to three indicators of country size: Area, Population and GDP. This way, it's easier to compare the asylum influx between small, medium, and large countries.

Table 1 shows the number of first asylum applications, country area size, inhabitants and GDP per country. The table is arranged by the number of asylum applications in decreasing order. In the last six months of 2017 Germany received the highest number of first asylum applications in the EU, followed by Italy and France. The Netherlands ranked 9th within the EU.

It is clear from table 1 that there are substantial differences in ranking when one takes into account the respective country area, inhabitants and GDP of the European countries. In the next subsection, these differences will be related to the number of asylum applications in more detail.

Table 2 relates the number of first asylum applications to the area size of the European countries and is arranged in decreasing order. By indexing the Total EU-28 figure as 1, it shows how many times more or less applications a country received relative to the EU average.

The largest number of asylum applications in Europe in relation to its area size is Malta (2.603 per 1.000 sq km) which receives 35,9 times more applicants than the EU average (74 per 1.000 sq km). Luxembourg and Cyprus ranked second and third at some distance with 6,0 and 3,9 times more applications than the EU average. The Netherlands ranked 7th in the EU with 3,0 times the EU average.

Greece and Luxembourg ranked second and third (4,4 and 3,0 times the EU average). The Netherlands ranked 11th in the EU with 486 applications per million inhabitants.

Table 4 shows the number of first asylum applications related to GDP size in PPS arranged in decreasing order. PPS stands for Purchasing Power Standard, this is a mathematical method used to compare GDP sizes of different countries by eliminating the different price levels. Due to rounding in the calculation of the results for "TOTAL EU-28" the value can diverge somewhat from the expected (non-rounded) result.

Greece, Cyprus and Malta were the number one, two and three with respectively 5,7, 5,5 and 3,4 times the EU average. The Netherlands ranked 13th with 0,6 times the EU average.
