Figures are sorted by total in 2019. Figures are rounded to the nearest multiple of 5. Figures include applications from EU citizens. "0" means data not yet available. The last column in the uppermost table is based on yearly data from Eurostat. Because of the aforementioned rounding to multiples of 5 there are small differences with the monthly data.

In 2019 Germany registered the highest number of applications, followed by France and Spain. Figures for September and October 2019 are not yet available for all EU countries. Syrian Arab Republic, Afghanistan and Venezuela are the most important countries of origin in the influx of first asylum applications in the EU.

### Introduction

Biannually the influx of asylum seekers in Europe is related to three indicators of country size: Area, Population and GDP. This way, it's easier to compare the asylum influx between small, medium, and large countries.

Table 1 shows the number of first asylum applications, country area size, inhabitants and GDP per country. The table is arranged by the number of asylum applications in decreasing order. In the first six months of 2019 Germany received the highest number of first asylum applications in the EU, followed by France and Spain. The Netherlands ranked 8th within the EU.

It is clear from table 1 that there are substantial differences in ranking when one takes into account the respective country area, inhabitants and GDP of the European countries. In the next subsection, these differences will be related to the number of asylum applications in more detail.

The largest number of asylum applications in Europe in relation to its area size is Malta (4.222 per 1.000 sq km) which receives 61,4 times more applicants than the EU average (70 per 1.000 sq km). Cyprus and Luxembourg ranked second and third at some distance with 10,3 and 6,3 times more applications than the EU average. The Netherlands ranked 5th in the EU with 4,1 times the EU average.

Table 3 provides an overview of the number of first asylum applications in relation to population size.

Cyprus received the most applications in the EU in relation to its population size: 7.562 applications per million inhabitants, 12,6 times the EU average (600 applications per million inhabitants). Malta and Greece ranked second and third (4,7 and 4,5 times the EU average). The Netherlands ranked 11th in the EU with 616 applications per million inhabitants.

Table 4 shows the number of first asylum applications related to GDP size in PPS arranged in decreasing order. PPS stands for Purchasing Power Standard, this is a mathematical method used to compare GDP sizes of different countries by eliminating the different price levels. Due to rounding in the calculation of the results for "TOTAL EU-28" the value can diverge somewhat from the expected (non-rounded) result.

Cyprus, Malta and Greece were the number one, two and three with respectively 14,5, 5,9 and 5,9 times the EU average. The Netherlands ranked 11th with 0,8 times the EU average.
