Figures are sorted by total in 2020. Figures are rounded to the nearest multiple of 5. Figures include applications from EU citizens. "0" means data not yet available. The last column in the uppermost table is based on yearly data from Eurostat. Because of the aforementioned rounding to multiples of 5 there are small differences with the monthly data.

In 2020 Spain registered the highest number of applications, followed by Germany and France. Figures for April, May and June 2020 are not yet available for all EU countries. Syrian Arab Republic, Afghanistan and Venezuela are the most important countries of origin in the influx of first asylum applications in the EU.

Introduction

Biannually the influx of asylum seekers in Europe is related to three indicators of country size: Area, Population and GDP. This way, it's easier to compare the asylum influx between small, medium, and large countries.

Table 1 shows the number of first asylum applications, country area size, inhabitants and GDP per country. The table is arranged by the number of asylum applications in decreasing order. In the second six months of 2019 France received the highest number of first asylum applications in the EU, followed by Germany and Spain. The Netherlands ranked 9th within the EU.

It is clear from table 1 that there are substantial differences in ranking when one takes into account the respective country area, inhabitants and GDP of the European countries. In the next subsection, these differences will be related to the number of asylum applications in more detail.

Table 4 shows the number of first asylum applications related to GDP size in PPS arranged in decreasing order. PPS stands for Purchasing Power Standard, this is a mathematical method used to compare GDP sizes of different countries by eliminating the different price levels. Due to rounding in the calculation of the results for "TOTAL EU-28" the value can diverge somewhat from the expected (non-rounded) result.

Cyprus, Malta and Greece were the number one, two and three with respectively 11,8, 10,3 and 7,9 times the EU average. The Netherlands ranked 11th with 0,8 times the EU average.
